

# Who we are

- Over 35 years' experience
- Market leaders in the UK
- State of the art technology
- Proven track record and reputation
- Clear accurate information
- Provide a range of pre-planning and post planning services
- Integrated survey, geophysics and engineering teams

# Who we work with

The Co-operative Group

Hammerson

Doncaster and  
Bassetlaw Hospitals  
NHS Foundation Trust

THE UNIVERSITY *of* York

GROSVENOR  
ESTATE

ARUP

Buro Happold

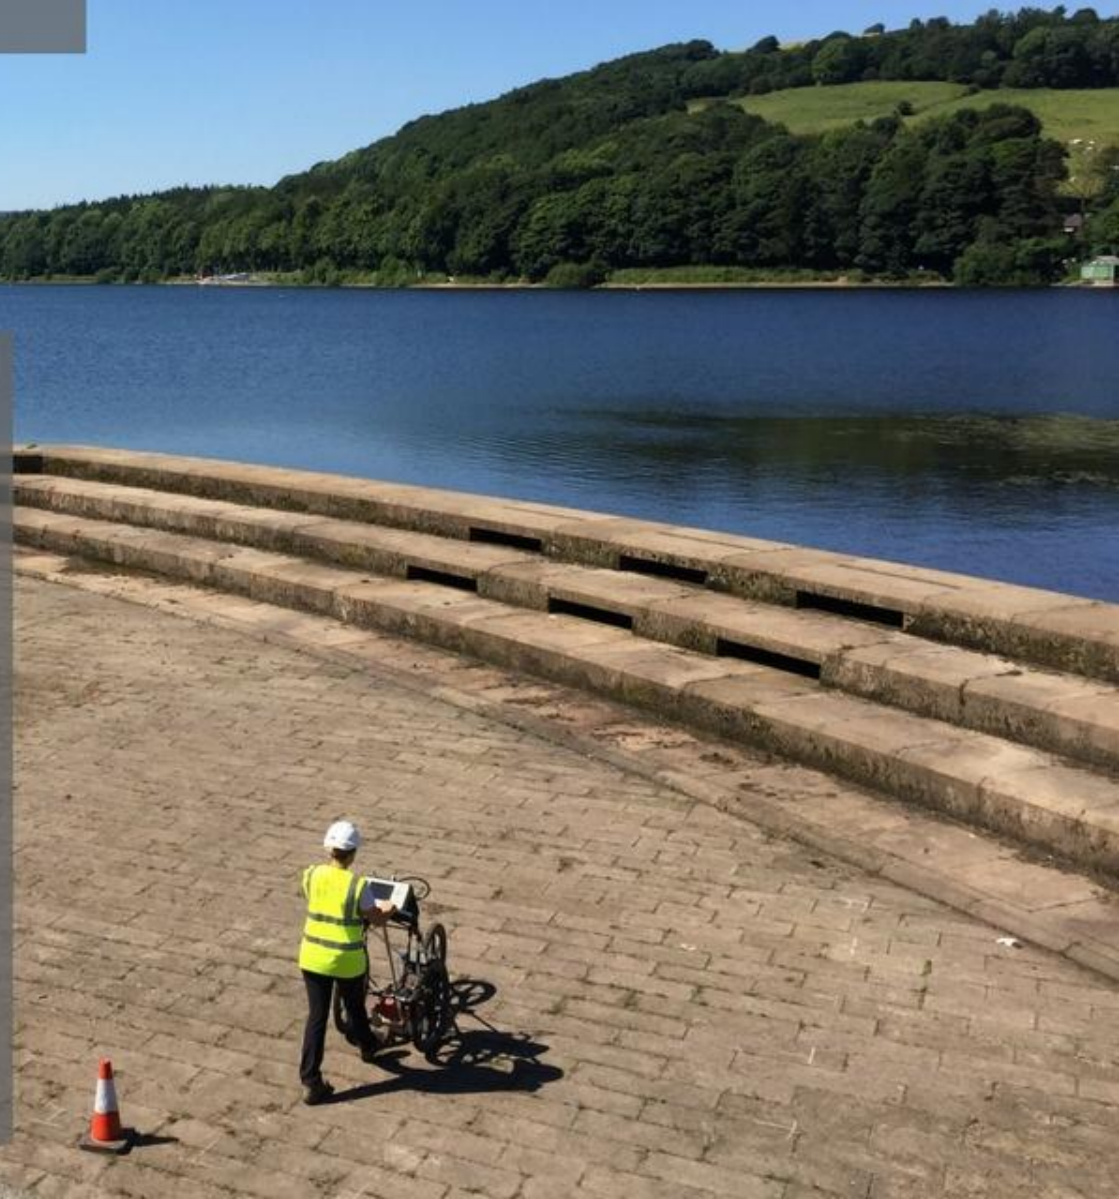

# What we do

- Quality focused
- Expert advice on demand
- Bespoke project solutions
- UK wide coverage
- Accurate information
- Diverse expertise
- Dedicated project manager
- Building Information Matters
- Blue chip clients

# Geophysics

- Archaeological geophysics
- Brownfield reconnaissance
- Environmental geophysics
- Mineshaft locations
- Void locations
- Rebar mapping
- UXO survey
- GPR
- Landfill investigation

# Utility mapping

- Desktop utility assessment
- CCTV survey
- Drainage survey
- Culvert survey
- GPR survey
- Utility detection survey

# PAS128

Experts in the  
PAS128 specification

Get the right survey  
type for your  
requirements

Find out more at:  
[www.pas128.metgeo.com](http://www.pas128.metgeo.com)

# Land Surveys

- Inland waterway
- Topographical
- Railway

# Measured building surveys

- Laser scanning
- Elevations and sections
- Asset survey & EPC
- Floor, ceiling and roof plans
- Revit modelling
- Scan to BIM

# Phase 1 - Desktop studies

- Archaeological assessment
- Feasibility studies
- Flood risk
- Green traffic plans
- Environmental impact
- Drainage feasibility
- Heritage impact
- Structural appraisals
- Traffic and Transportation

# Phase 2 - Site investigation

- Non-intrusive investigation
- Boreholes
- Trial pits
- Infiltration testing
- In-situ gas & water monitoring
- Laboratory soil & water testing
- In-situ geotechnical testing
- Qualitative & quantitative risk assessment

# Phase 3 & 4 - Remediation and Validation reports

- Soil testing
- CCTV inspections
- Rebar and concrete inspections

# Civil Engineering

An aerial photograph of an industrial and commercial district. The image shows a mix of large industrial buildings with flat roofs, smaller commercial structures, and extensive parking lots filled with cars. A road network is visible, including a roundabout. The background shows a river and some green spaces.

- Ground modelling
- Drainage design
- Pre-planning services
- Highway design
- Traffic and transport assessments

# Structural Engineering

A photograph of two structural engineers in high-visibility yellow jackets and white hard hats reviewing architectural plans on a construction site. The site features a large, open steel frame structure with a high, vaulted roof and skylights. A third worker in a yellow jacket is visible in the lower-left foreground, working on a concrete slab. The background shows various construction materials and equipment.

- Foundation design
- Structural appraisals
- Superstructure design
- Retaining structures
- Building options analysis

# Accreditations
